

## INDEX TO THE NZ MODEL RAILWAY JOURNAL, FEBRUARY 1986 TO NOW

**SEARCHING:** You can search this index in Adobe Reader by clicking Ctrl+Shift+F or clicking the arrow beside the **Find** button. Click **Open Full Reader Search** and type a word or phrase to search for into the box headed: **What word or phrase would you like to search for?** then click **Search**.

You can search for any part word, word or phrase.

**Hint:** Take care with spelling and if in doubt use part words, ie, search for "kero" rather than "kerosine", which can be spelt two ways.

**Hint:** Most topics begin with a category heading, such as Locomotivery, Tools, etc, and it may often be useful to search by one of these categories.

Your search will return a list of all the matches to the text you typed. You can click on any of these to see the full entry and what else is in the same *Journal*. (Note: The matches listed usually include text from the beginning of the next item. The end of the searched item is marked by two hash ## signs.

**Errors and other problems:** Please report typos or other errors, or any problems using the index to Peter Ross, [peterr@inet.net.nz](mailto:peterr@inet.net.nz)

### KEY TO CATEGORIES:

<b>Added detail:</b>	Self-explanatory.
<b>Bits &amp; bytes:</b>	Use of digital (ie, computer) technology, including DCC and onboard sound.
<b>Bridges:</b>	Bridges, culverts, viaducts, etc. road or rail.
<b>Car &amp; wagon:</b>	Carriages, wagons and other rail-mounted equipment, eg, mobile cranes.
<b>Electrics:</b>	Wiring layouts, making, applying or controlling electronic accessories. For DCC see Bits & Bytes.
<b>Hints and tips:</b>	Self-explanatory.
<b>Interview:</b>	Self-explanatory.
<b>Locomotivery:</b>	Pertaining to the modelling of locomotives.
<b>Operation:</b>	Articles on running a model railway or on how the real railway is run.
<b>Perspective:</b>	Proposals and personal opinion.
<b>Photo:</b>	Self-explanatory.
<b>Plan and photos:</b>	Prototype info suitable for basing a model on.
<b>Plan, text and photos:</b>	Comprehensive prototype info suitable for basing a model on.
<b>Prototype:</b>	Information about the real railway including how it is or was operated.
<b>Rail history:</b>	Prototype information predominantly of interest as historical background.
<b>Report:</b>	A (usually personal) account of a recent event of interest to modellers.
<b>Review:</b>	Self-explanatory.
<b>Road vehicles:</b>	Includes diecast models as well as scratch or kitbuilt models.
<b>Scenicking:</b>	All forms of scenery including backscenes, water, roads, landform and land cover, rock faces, grass, scrub, flax and low ferns but not trees.
<b>Signalling:</b>	Understanding and modelling signals and signalling practice.
<b>Structures:</b>	Building, gates fences, etc, excluding bridges.
<b>Techniques:</b>	Ways of using materials and tools to make a model.
<b>Tools:</b>	Aids to model building – includes implements and processes, marking and measuring equipment, charts, cameras, computers and computing, means of attaching parts to each other, eg, glues, solder, nuts and bolts, etc.

<b>Trams:</b>	Bush and urban and associated material.
<b>Trackwork:</b>	Track, pointwork, turntables, etc, on which trains run.
<b>Trees:</b>	Trees including tree ferns and cabbage trees.
<b>Wagon loads:</b>	Self-explanatory.
<b>Weathering:</b>	Self explanatory
<b>xx Diorama:</b>	Where xx is a scale ratio, eg, 1:64, indicates an article about a diorama (small scene) to that scale
<b>xx Layout:</b>	Where xx is a scale ratio, eg, 1:64, indicates an article about a layout to that scale.
<b>Comment:</b>	Otherwise known as editorial.
