

Nine Mill Fiftieth Anniversary

National Get-together.

In 2020 it is fifty years since the beginning of the modern reincarnation of 9 mil scale in New Zealand. In that time we have never had a country-wide gathering of like-minded 9 mil modellers.

We propose such a gathering, to be held in Hastings on Anzac weekend over Saturday 25th, Sunday 26th and Monday 27th April 2020.

It would be our ambition to have at least one layout at the venue together with displays of models and other features befitting the occasion.

We would hope to have a few selected clinics and demonstrations.

We would like an indication from those interested so we can ensure the venue we have in mind is suitable. We have in mind a local hall with both good spaces for all activities and catering facilities.

Those people who reply to this will be on the list for further newsletters leading up to the event with no obligation.
